

RINK OF DREAMS, SMITHS FALLS

Argue Construction prides itself on giving back to our community when the opportunity presents itself.

In the fall of 2014 Argue Construction was pleased to assist with the construction of the **Gerry Lowe Memorial** Senators Foundation Rink in Smiths Falls as a General Contractor, contributing our services from the design phase to the completion of the rink. The Rink of Dreams is an outdoor multi-purpose complex, created in partnership with the Gerry Lowe Foundation and the Senators Foundation. It is open year round to, allowing people of all ages the opportunity to play, offering ice hockey and public skating in the winter and basketball and ball hockey in the spring, summer, and fall.

ACL recruited several volunteers (e.g. engineers, trades, sub-trades, and suppliers), reviewed pros/cons of the types of materials (e.g. the concrete slab), coordinated on-site requirements, and more. The rink was completed on time and officially opened in early 2015.

We are very proud to have been involved in such an important project for the Smiths Falls community.
