Re. Open Reference Letter for Argue Construction Limited

Please accept this open reference letter for Argue Construction Ltd., based upon my recent experience working with their project team during the construction of the Frontenac Paramedic Services Ambulance Station in Roberstville, ON. The project was delivered using the design-build model which required the contractor to coordinate the design services work followed by on site development and construction. The completed facility meets LEED Silver certification criteria and provided excellent value for the facility end users.

As a Project Manager representing the County's interests, I confidently recommend Argue Construction to other facility owners contemplating their involvement on a project.

I am available to discuss this recommendation in further detail, should you require.

Regards.

Patrick Thompson, P.Eng.
