Re: Baird Construction Management Ltd

To Whom It May Concern:

I am very pleased to provide this letter of recommendation relating to Baird Construction Management Ltd. whom the Almonte General Hospital has utilized on two occasions over the past two years to complete the construction of a new Ambulance Base and for a major medical office renovation program.

On both occasions we found their work to be impressive and outstanding. Both assignments were started and completed on schedule and within the stipulated contract price and estimates provided for the projects. Their staff was very professional, competent and they made a number of excellent suggestions during construction that resulted in financial savings for our organization. Their project manager maintained excellent site conditions and went out of his way to minimize any interruptions to our operations during the construction phases of the project.

I would have no hesitations in recommending the services of Baird Construction Management Ltd or utilizing their services on another occasion.

Sincerely,

R.K. Timmons  
Executive Director
