Re: Baird Construction Management Ltd.

To whom it may concern,

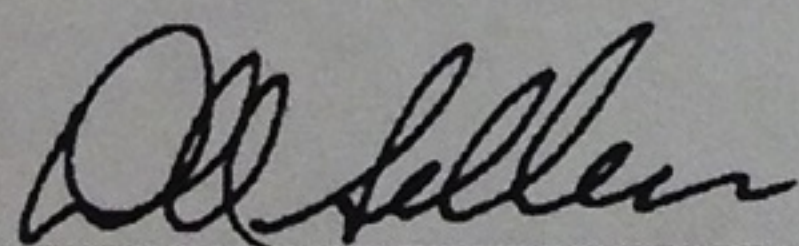

I am delighted to write a letter of recommendation on behalf of Baird Construction Management Ltd. regarding the addition and renovation work completed on the West Carleton Medical & Dental Centre. Overall, Baird Construction was very knowledgeable, flexible and professional.

This addition and renovation was both a large and challenging undertaking given that the Medical and Dental Centre remained open during the construction period. With approximately 150 clients passing through the Medical and Dental Centre on a daily basis it was important that Baird Construction maintain jobsite cleanliness and order, and that they did. In this way, they minimized disruption, remained mindful of our operating needs, and were extremely accommodating.

During the construction phase, I made the decision to add items to the contract. This increased both the scope of work and the associated construction costs. Baird Construction was again very accommodating and despite this increase in work they were able to complete the construction ahead of schedule.

Both Shawn Argue (President and project manager) and Ben Brandino (site supervisor) maintained a strong presence on the construction site. Shawn visited the site and assessed the work at least twice a week and also attended meetings that were held every second week with myself and the design staff. Ben also maintained a strong presence as he was the first one on the site each day and the last to leave. Ben was diligent, organized, responsive, and very easy to work with.

Overall, my expectations of Baird Construction were not only met, but also exceeded. I can say without hesitation that I would recommend Baird Construction Management Ltd. for construction services and I would also be inclined to use their services again if the opportunity arose.

Dave Sellers – Director of Operation
