

Shawn Argue
President & Project Manager
Argue Construction Ltd.

December 19, 2013

To Whom It May Concern:

Subject: Mississippi Valley Conservation Authority New Office Headquarters

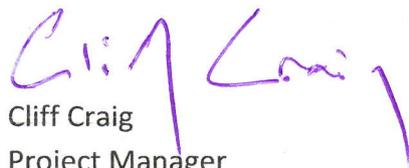

I am happy to provide a letter of reference for Argue Construction Ltd. regarding the above project. The building, located at 10970 Hwy 7 in Carleton Place, is called the Mississippi Valley Conservation Centre and is the proud new home of conservation authority staff providing a community connection across the watershed.

The project was delivered on time and under budget and met the high standards required by the Conservation Authority. I appreciate the commitment that Shawn Argue and his team brought to the MVCA project both with regard to the environmental goals and our budget requirements. Throughout the realization of the project your team has demonstrated a high degree of professionalism and thoroughness.

You have given us a building we can be proud of. The facility provides the Conservation Authority with a work environment which will enhance its effectiveness and identity while demonstrating a commitment to environmental stewardship.

We are extremely pleased with the performance of your company and we would happily work with you again on future projects.

Yours sincerely,

Cliff Craig
Project Manager
MVCA New Office Project
