To whom it may concern,

Argue Construction Ltd. were the construction managers for our new office building/shop/repair garage facility located at 2688 Carp Road. Their professionalism and expertise throughout the whole building process were bar none.

We have been working out of our new office building for a little over a year now and I can't say enough about how much my staff and I love coming to work here everyday.

Our businesses were growing and we wanted to reach our goal of combining all of our operations under one roof. This project combined both our requirements for office space as well as the space we needed for our trucking business. Our trucking business which was already operating on-site of our newly constructed facility needed to remain operational throughout the building process. Argue Construction was able to safely coordinate and manage the facility construction and new Hydro service without any interruption to our daily activities.

Overall, this project brought our vision to life and our new 7,800 ft2 facility complete with five truck repairs bays was built.

I would not hesitate to recommend Argue Construction to other organizations wishing to obtain construction services from experienced and reliable contractors.

Best regards,
