To Whom It May Concern,

Argue Construction Ltd. have been the General Contractors for three of our plant additions and retrofits over the past four years.

The projects consisted of a 22,000 ft² Phase 9 addition, a retrofit of the existing Phase 4 & Phase 6 facilities to extend the existing Phase 4 plant, retrofit of the plant office/bathroom facilities and the recently completed demolition & reconstruction of the new 15000 ft² Phase 2 facility.

As the M CON precast concrete plant is an incredibly busy site, with vehicles and equipment travelling and loading materials throughout the day, safety is paramount to operations of the plant and well being of the staff. Argue Construction worked in conjunction with the M CON plant staff to ensure that both construction and plant forces were coordinated and supervised to ensure work progressed in a safe manner with minimal interruptions to the day to day operations.

Throughout the four years that Argue has constructed the additions at the M CON facility, they have managed over 95,000 manhours without a lost time injury.

I would not hesitate to recommend Argue Construction to other organizations wishing to obtain construction services from experienced and reliable contractors.

Regards,

John Mion
Owner/President
